

Hybrid event details

The conference will have a small physical part as well as an online part.

The **online part** will be held using the zoom platform. All the presenters will be informed of the details of the process as soon as the systems have been setup. The presentations will be made in real time using a .ppt file. Each talk is assigned a total of approximately 20 minutes (including 3 minutes for Q&A). A practice session will be available a few days before the conference to check all the necessary technical and non technical details. Session chairs may ask for a pre-submission of the presentation file in order to avoid last minute technical incompatibilities.

The **face-to-face presentations of the workshops** will take place at the premises of the University of Piraeus (80 Karaoli and Dimitriou str, Piraeus, 18534, Greece) on Sunday, September 5. The talks will be given in the second floor laboratories (+30 210 414 2458, +30 210 414 2127).

The **face-to-face presentations of the main conference** will take place at the Electra Palace Hotel on Wednesday, September 8. We will share space with a new sister IEEE COMSOC conference MeditCom (<https://meditcom2021.ieee-meditcom.org/>). Attendees may want to use the services offered by Meditcom. Once in Greece, if necessary, you can contact the general co-chair Prof. Christos Douligeris (cdoulig@unipi.gr, +306944120153, skype: cdoulig)

Details on social events (museum visits, conference dinner and steering committee get together) will be announced as we finalize the details on the people who will be with us physically.

The headquarters of the local organizing committee will be at the University of Piraeus.

Do not hesitate to contact us regarding anything you may need. We want to make it the best experience possible, no matter whether you are in Greece or in the virtual space.
